

# APCUG SPEAKERS BUREAU PARTICIPATION BY THE TCS

As an active participant in the "APCUG Speakers Bureau", the [Tucson Computer Society \(TCS\)](#) has been making online presentations to other users groups throughout North America and possibly to the rest of the English-speaking world. This innovative program utilizes [iLinc](#)'s Webinar, desktop sharing and video conferencing capabilities. In the fourth quarter of 2011, [APCUG](#)'s directors decided that [iLinc](#) would be a great way for communications, between user groups. The Tucson Computer Society will provide APCUG member groups with presentations about various topics related to the use of "Windows", "GNU/Linux", and Apple "Mac" computers.

Our list of topics can be viewed at

<http://aztcs.org/fc.pdf>

and

<http://www.apcug.net/speakers/fc.htm>

The description of the entire "APCUG Speakers Bureau" program is available at

<http://www.apcug.net/speakers/index.htm>

Please note that a significant number of topics on this page are from presentations that have been presented by TCS members at our [Windows 8/Hardware SIG](#) and [Linux SIG](#) meetings.

We intend to participate significantly in this innovative program: Any TCS member can volunteer to participate by contacting [Francis](#) or any member of the [Board of Directors](#) of the Tucson Computer Society.
