SUMMARY

"Short Message Service" (= SMS, = "texting") and "Multimedia Messaging Service (= MMS) allows a cell phone to send short text messages and multimedia files to another cell phone. You can use your email service to send email messages and multimedia files that arrive at a cell phone as SMS or MMS messages.
TOPICS

• SMS Texting From Cell Phone To Cell Phone
• MMS Messaging From Cell Phone To Cell Phone
• txtdrop.com And txtdrop.net To Send SMS Text From A Web Browser
• email-to-SMS/MMS gateways
• Determining the email address of a cell phone
SMS TEXTING

- SMS = "Short Message Service"
- Generically called "texting"
- Originally designed for 160 character text messages that are instantly sent from one cell phone to another cell phone
SMS TEXTING (continued)

- SMS texts travel via the interconnected cell towers of various cell phone providers
- SMS texts do not travel over the Internet
- Up to 10 recipients per SMS message
SMS TEXTING (continued)

- SMS text messages travel through the voice stream of your cell phone plan
- SMS text message are charged to the voice portion of your monthly cell phone bill, if there is a charge
MMS MESSAGING

• MMS stands for "Multimedia Messaging Service"
• Messages can have text and multimedia files that are sent from one cell phone immediately to another cell phone
MMS MESSAGING (continued)

• MMS messages can exceed the 160 text character limit with the limit set by your cellular provider
• Up to 10 recipients per MMS message
MMS MESSAGING (continued)

- Step 1: MMS messages initially travel via the cell towers of the sender's cell phone provider.
- Step 2: Then they go through the Internet to the cell towers of the recipient's cell phone provider.
MMS MESSAGING (continued)

• Step 3:
  Then they go through the from the cell towers of the recipient's cell phone provider to the recipient's cell phone as part of the "voice stream" communications between the cell towers and the recipient's cell phone.
MMS MESSAGING (continued)

- "Step 2" is not utilized if both the sender and receiver of a MMS message are using the same cell phone provider.
MMS MESSAGING (continued)

• If your email message violates some aspect of the format requirements of the recipient's cell phone provider, then your email message will bounce.
PATH OF SMS TEXT MESSAGES SENT FROM ONE CELL PHONE TO ANOTHER CELL PHONE
PATH OF MMS TEXT MESSAGES FROM ONE CELL PHONE TO ANOTHER CELL PHONE
• MMS messages are usually charged to the data portion of your monthly cell phone bill, if there is a charge. However some cell phone providers charge for MMS messages separately from the regular data plan with a separate "MMS Data" line item in their subscriber's monthly bills.
txtdrop.com And txtdrop.net To Send SMS Text From A Web Browser to a Cell Phone

• From a Web browser in any Internet-connected computer, tablet, or cell phone, you can use txtdrop.com and txtdrop.net to send a SMS text message to any cell phone
txtdrop.com And txtdrop.net To Send SMS Text From A Web Browser to a Cell Phone (continued)

• When you use a Web browser to go to http://txtdrop.net it looks like this:
International texting in just one easy step!

From:  
To:  
Carrier:  3 River Wireless  
Message:  
Send

Send Pictures To Your Phone!
txtdrop.com And txtdrop.net To Send SMS Text From A Web Browser to a Cell Phone (continued)

• When you use a Web browser to go to http://txtdrop.com it looks like this:
Your Email Address: (It's For Replies!)

Recipients Mobile Phone Number:

Your Free Text Message:

Your Mobile Carrier Is Scared Of TxtDrop! ;)

Send
You have to provide them with your valid return/reply to email address: If you do not do so, the SMS text message will never be sent to the intended recipient.
txtdrop.com And txtdrop.net To Send SMS Text From A Web Browser To A Cell Phone (continued)

• When you use txtdrop.com in a Web browser to send a SMS text message to any cell phone, you get a two error messages that are spurious and can be ignored:
Your Email Address: (It's For Replies!)

test12345@outlook.com

Recipients Mobile Phone Number:
714 123 4567

Your Free Text Message:
adfafaafdafafafa

Send

EMAIL-TO-SMS
TEXT/MMS
GATEWAYS
EMAIL-TO-SMS TEXT/MMS GATEWAYS

• Each cell phone provider provides a gateway for their cellular customers: This gateway provides an email address that belongs to your cell phone by bi-directionally converting emails to SMS Text Messages and MMS messages for your cell phone.
This gateway provides an email address in the format of <10 digit phone number>@domain name of email provider such as 714-123-4567@tmomail.net
Then email messages that are sent to email addresses such as 714-123-4567@tmomail.net and converted to SMS or MMS messages and then they are forwarded to the "Messages" app.
PATH OF EMAIL MESSAGES SENT FROM A COMPUTER, TABLET, (OR A CELL PHONE) TO A CELL PHONE AS A SMS OR MMS MESSAGE
sender's email service's servers

Email client app or Webmail access via Web browser

Sender's computer, tablet, or cell phone

Email to SMS or MMS Gateway of recipient's cell provider

"SMS or MMS Center" of recipient's cell phone provider's cell towers

Recipient's cell phone

Messages app
PATH OF EMAIL MESSAGES RECEIVED IN A COMPUTER, TABLET (OR A CELL PHONE) THAT ORIGINATED FROM A CELL PHONE AS A SMS OR MMS MESSAGE
DETERMINING THE EMAIL ADDRESS OF A CELL PHONE

• Various Web sites can help you determine the email address (of the email to SMS/MMS gateway) of a specific cell phone:
